## Isolation and Expansion of GMP-grade Adipose-derived Stem Cells for Clinical Application in Urology

Szeliski K., Buhl M., Balcerczyk D., Kloskowski T., Jundziłł A., Rasmus M., Drewa T., Pokrywczyńska M.

Nicolaus Copernicus University, Ludwik Rydygier Collegium Medicum, Chair of Urology, Dept. of Regenerative Medicine, Cell and Tissue Bank, Bydgoszcz, Poland

## Study Aim: to find and evaluate the most optimal culture conditions for hADSCs compliant with GMP

- 1. MII and MIV present most promising results for GMP-grade hADSCs production
- 2. Additional research evaluating differentiation potential of cells cultured in this media is required
